

# UPHOLSTERY PRO

*Upholstery cleaning experts are already calling the Upholstery Pro the best tool ever!*

Precision flow control allows for easy, on-the-fly adjustments while the continuous flow option relieves the strain of holding the valve. Dual vacuum slots allow you to extract in both directions for the best clean possible. Unlike jetted tools, the Upholstery Pro does not produce overspray. The cleaning head is correctly angled and carefully balanced to reduce wrist, arm and back fatigue, making the Upholstery Pro far easier to use than other tools on the market.
